Operation Steps:

1. Connect the battery to the charger with correct polarity (Red cable connects to positive, Black cable connects to negative)
2. Then plug the power cord into the AC power.
3. After fully battery charged, disconnect battery from charger first, then unplug from AC power
4. The charging time is variable depends on the battery

Caution:

- Use indoor only, in a clean and ventilated place
- The charger shall be placed on a fixed horizontal surface when the charger is operated
- Avoid storing or operating the charger in highly humid place or any place with inflammable material
- Do not cover the charger when the charger is operated, especially air fan area.
  The ambient temperature shall not excess 40 ˚C
- This charger is only for 25.6V for LiFePO4 battery or 25.9V for lithium battery with Capacity ≥ 6Ah
- Completely plug the power cord into AC power resource
  Do not expose any metal part of the power cord during operation
  Do not use your hand or any of your body to touch the metal part of the power when you connect the power to the charger
- Keep away from Children
- Do not disassembly the charger any time
- AA Portable Power is not responsible for any damage caused by any misusage
